PRESENTATION

The University of Barcelona is hosting an international workshop titled '*Regulating autonomous weapons systems: legal and ethical implications in the context of a global society*'. This academic event brings together researchers, practitioners and experts who will focus on topics related to different R&D experiences and will provide a prospective approach centered on the principles and rules of applicable International Law, in particular International Humanitarian Law and International Human Rights Law.

The workshop will include discussions on autonomous weapons systems and their potential impacts on humanity and society. Emphasis will be placed not only on technology and public policy issues, but also on the scope of their ethical, cultural and socio-economic implications.
